Nguyen Quang Khai

Senior Tester

0917748386 nguyenkhai1203@gmail.com Hanoi, Vietnam

OBJECTIVE

A world class player

EDUCATION

Hanoi University Aug 2011 - Jun 2016

Major: Computer Science

WORK EXPERIENCE

Minswap Lab July 2025 - Now

Senior Quality Control Engineer - Team Size: 10 dev

Minswap Labs is the leading Decentralized Exchange (DEX) & Liquidity Aggregator on the Cardano blockchain.

Responsibility: Take responsibility for the main product of company: Decentralize Exchange

- *End-to-End Lifecycle Management*: Receive requirements from PM, create testing material, test and follow release.
- *Performance Optimization:* Design and execute performance tests for critical APIs to ensure architectural updates do not impact user experience.
- *Automation Framework Development:* Build robust testing frameworks using Playwright and Python scripts to validate API/DB and maximize data accuracy.
- *Modernized Tooling & Collaboration:* Migrate API testing workflows to Bruno to enhance environment management and team collaboration.

Project:

- *Minswap DEX*: The flagship Decentralized Exchange on Cardano, ranking #1 in Total Value Locked (TVL) and transaction volume since 2022.
- *Minswap Aggregator:* A next-generation liquidity aggregator integrated with nearly all major decentralized exchanges on Cardano to optimize trading rates.

Tool:

- Linear, Figma, Qase
- Bruno, Po Playwright, Python
- K6, Charles proxy, Requestly.io

WAX.IO Aug 2023 - Dec 2025

Senior Tester - Team Size: 15 DEV

WAX.IO is a prominent US-based Blockchain startup specializing in NFT gaming ecosystems built on the EOS blockchain.

Responsibility: Take responsibility for all products of the team:

- *Core Quality Ownership:* Lead end-to-end testing strategies for the team's entire product suite, including web wallets, mobile applications, multi-chain bridges, and Telegram mini-games.
- *Test Design & Execution:* Design comprehensive test suites, checklists, and test cases covering functional, security, regression, and User Acceptance Testing (UAT).
- *High-Scale Performance Testing:* Engineer and execute performance test scenarios simulating up to 100k RPS using K6 and Grafana to guarantee infrastructure resilience under heavy loads.
- *Cross-functional Collaboration:* Partner closely with Product Owners and developers to resolve bugs, streamline retesting cycles, and deliver actionable insights for technical risk mitigation.

Project:

- *Mycloudwallet.com* : A custodial wallet on website
- *An mobile application (unpublished) (IOS + Android)*: A custodial wallet on mobile
- *Bridge.mycloudwallet.com*: a bridge Token/NFT on multichain: Wax, Solana, EVM chain.
- *Telegram bot*: a gaming bot on Telegram, where users can play games, tap,... to earn tokens

Tools:

- Jira, Figma, Mindmup, Testrail
- K6, Grafana
- Charles proxy, Requestly.io

Xantus Network Apr 2022 - Aug 2023

QA manager - Team Size: 20 DEV

Xantus Network is a Singapore-based Blockchain startup focusing on Decentralized Finance (DeFi) and GameFi solutions.

Responsibility: Lead and take responsibility for all products of the company:

- *QA Leadership & Process Improvement:* Establish and optimize cross-team coordination processes to accelerate incident resolution and enhance overall Agile team velocity.
- *Test Strategy Formulation:* Develop master test plans, designs, and checklists to support Business Analysts and Product Owners in feature verification.
- *Comprehensive Multi-Tier Testing:* Supervise and execute full testing cycles (Functional, Security, API, UAT, and Regression) for Web3 and mobile applications.
- *Talent Mentorship:* Mentor and train newcomers (including BAs) on Web3 fundamentals and internal testing workflows.

Project:

- *Oxalus*: an all-in-one NFT analytics platform, gaming wallet, and marketplace aggregator.
- *DeFi & GameFi Staking:* Custom staking protocols and yield-farming platforms for enterprise clients.

Tools:

- jMeter, K6, Grafana.
- Charles proxy, Postman, Swagger.
- Jira, Notion, Figma, Mindmup.
- MySQL, PostgreSQL, Elasticsearch
- A custom tool to check Race condition testing.

TechComBank Securities Mar 2021 - Apr 2022

Manual Tester - Team Size: 10 DEV

TCBS is a leading investment bank and Wealthtech pioneer in Vietnam.

Responsibility:

- *FinTech Core Testing:* Conduct detailed functional and API testing for the core Bond Trading platform, validating critical transaction systems and financial data flow.
- *Framework Contribution:* Assist in the early-stage development, maintenance, and implementation of the internal Automation Testing Framework.
- *Performance & Stability:* Execute load and stress testing for critical banking functions using JMeter and Grafana to maintain high system availability.
- *Peer Review & Reporting:* Create, review, and optimize test cases for team members; manage comprehensive test reports and verify production deployment stability.

Project: *TCInvest Bond Trading:* The primary financial platform for corporate and individual bond trading in Vietnam.

Tools:

- jMeter, Grafana
- Postman, Swagger
- Jira, Jenskin, Git
- SQL server

Timebit R&D Apr 2020 - Mar 2021

Technical Tester - Team Size: 20 DEV

Timebit R&D focuses on developing secure cryptocurrency trading solutions and enterprise e-commerce systems.

Responsibility: Test web and mobile applications (finance, crypto and e-commerce application)

- *Team Management:* Manage and delegate tasks to a dedicated team of 4 manual testers, aligning resource capabilities with strict sprint deadlines.
- *Advanced Testing Execution:* Spearhead performance and security assessments utilizing JMeter alongside custom tools tailored for Race Condition testing in crypto exchanges.
- *Technical Analysis:* Analyze software specification documents to clarify requirements for team members and design thorough regression and API test suites.

Projects:

- *Timebit Exchange:* a system of trading platform include: exchange, user service, wallet service
- *xMall:* an e-commerce application, help people trade goods paid by crypto. collect reward by staking, trading, referring.
- Some backend-services: use Jmeter to test performance, a custom tool to check Race condition.

Tools:

- jMeter
- Postman, Swagger
- MySQL, MongoDB, PostgreSQL
- Git

Topica Edtech Group Oct 2018 - Mar 2020

Tester - Team Size: 20 DEV

Topica Edtech Group is a leading educational technology provider in Southeast Asia.

Responsibility:

- *AI Model Validation:* Design targeted test cases and checklists to validate core AI image recognition and search algorithms, ensuring highly accurate answer-matching.
- *Large-Scale Data Operations:* Lead and train a data curation team of 50-70 interns, optimizing high-quality data labeling workflows for AI training models.
- *Dual Role Delivery:* Act as a hybrid BA/QA to design internal admin management systems and ERP modules, streamlining data control workflows.

Projects: *Solvee*: An AI-driven homework solver application capturing over 1 million active users.

Tools:

- Postman
- SQL
- Jira, Confluence
- Google spread sheet

SKILLS

Language	English: in-fluent reading + writing
API testing	Charles Proxy, Postman, Bruno, Swagger,
Automation testing:	Playwright , Robot Framework, Selenium
Performance testing	Jmeter, K6
Document + tracking bug	Jira, Confluence, Figma
Database	MySQL, SQL Server, PostgreSQL, MongoDB, Elasticsearch
Others	Device Farm, RobotFramework, Selenium, web3 tool, Git

PROJECTS

Minswap DEX & Aggregator - Team Size: 10 2025 - Now

Senior Quality Control Engineer

- Client: Minswap Lab
- Technology: Playwright, Bruno, Python, K6, Grafana
- Deliver end-to-end QA for core DEX and Aggregator products; build robust automated frameworks using Playwright and Python; execute performance testing with K6; and modernize API workflows via Bruno.

WuffiTap - Team Size: 15

5-2024 - 2025

Senior tester

- Client: WAX.IO
- Technology: Manual testing, Jira, Figma, Mindmup, Testrail, K6, Grafana
- Collaborate with team members to test the application, demo features to the team leader, and execute performance tests for 100k RPS.

Mycloudwallet.com - Team size: 12

2023 - 2025

Senior tester

- Client: WAX.IO
- Technology: Manual testing, Jira, Figma, Mindmup, Testrail, Charles proxy, Requestly.io
- Test the full functionality of the project, demo to the team leader, and write guidelines for the CS team.

Bride.mycloudwallet.com - Team Size: 12

2023 - 2025

Senior tester

Name of customer: Wax.io
Team Size: 12
Technology:

- Manual testing, Jira, Confluent
- Test whole function of the project, demo to team leader and write guide line for CS team

Oxalus.io (Social NFT trading) - Team size: 15

3/2022 - 8/2023

TESTER

- Client: Xantus Network
- Technology: Manual test, API - Jira, Postman, Charles Proxy, Swagger - JMeter, K6, Grafana
- Set up and start the project from scratch. Test all web and mobile applications, create test designs/test cases, execute tests, and perform performance testing.

TCBS Invest - Team size: 10

2020 - 2021

TESTER-QC

- Client: TCBS
- Technology: Manual test, API - Jira, Postman, Swagger, Jenkins, Git - JMeter, Grafana, SQL Server
- Test core services and execute performance testing for critical financial functions.

Timebit Exchange - Team size: 20 2019 - 2020

Technical tester

- Client: Timebit R&D
- Technology: Manual test, API - Jira, Postman, Swagger - JMeter - MySQL, MongoDB, PostgreSQL - Git, Custom Race-Condition Tool
- Test web applications, perform performance and security testing, lead the QC team, and review test cases.

Solvee - Team size: 30

2019 - 2020

TESTER-QC

- Client: Topica Edtech Group
- Technology: Manual test, API - Jira, Postman, Basecamp, Lucidchart - Device Farm, Google Sheets, SQL

- Test applications, manage and train the internship team, and lead the data quality control team.

INTERESTS

I like running, discovering about new technology, try to apply new technology in working.
