Trần Thị An Bình

Test Engineer

0985673932 tranthianbinh2000@gmail.com Hanoi, Vietnam

OBJECTIVE

● Short-term goal: To become a Senior Test Engineer within the next 1,5 years by expanding my technical expertise and contributing to high-impact testing projects.
● Long-term goal: To grow into a Test Expert within 3 years, deepening specialised expertise and driving quality assurance strategies across teams and projects.

SKILLS

Testing & Quality Assurance	Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC); Business Requirement Document (BRD) and Software Requirement Specification (SRS) analysis; test levels (Unit, Integration, System, User Acceptance Testing – UAT); test types (Functional, Regression, Smoke, Sanity); test case / scenario / checklist design; Agile/Scrum.
API, Automation & Performance Testing	Postman, SoapUI (REST/SOAP); Katalon Studio; Seledium;JMeter
Databases & SQL	Oracle, SQL Server, MySQL; DBeaver
Banking Domain & Compliance:	Core banking (T24, FCC); payments, lending, savings, cards; SBV regulatory compliance, EKYC
Defect & Test Management	Jira, Redmine, Backlog; Slack
AI Tools	ChatGPT;Copilot; Claude

WORK EXPERIENCE

Loc Phat Vietnam Joint Stock Commercial Bank (LPBank) *Jan 2023* - Present

Projects: ***Digital banking applications — LPBank app/web (Retail) & LPBank Biz (Corporate); payment soundbox; internal management systems (VVTeller, Uniform, VVAdmin, LOS); core banking (T24, FCC).***

Test Engineer - Key member and manager of the testing team ***Oct 2023- Present***

- Designed and executed test cases for critical features and business flows across the mobile app and web.
- Managed a QA team of 8–10, owning test planning, task assignment, and progress tracking.
- Reviewed SIT test cases from team members and UAT test cases from partner departments to ensure coverage and accuracy; mentored team members on testing techniques.
- Tested core business requirements — payments, transfers, partner collection, lending, savings, and cards; ensured compliance with SBV regulations (Decision 2345; Circulars 15, 17, 18, 77, etc.).
- Leveraged AI to generate test cases and scenarios from requirements, create test data, and develop and optimize automation scripts — improving testing speed and coverage.
- Produced daily, weekly, and monthly test reports for stakeholders; worked closely with business and development teams in an Agile/Scrum environment.
- Validated urgent hotfixes before production release.

Test Engineer – Key Member *Jan 2023 - Oct 2023*

- Performed end-to-end functional testing of LPBank's mobile (iOS/Android) and web banking apps for retail and corporate customers — products serving a retail base of up to ~5 million — covering core flows: payments and transfers, partner collection, savings, lending, credit, cards, and promotions.
- Tested UI/UX across multiple devices and platforms and verified UI upgrades for layout consistency and functional accuracy.

- Tested the merchant payment soundbox and partner collection services.
- Analysed BRD/SRS and built test plans and checklists; designed and executed test cases and scenarios to business requirements.
- Performed REST/SOAP API testing with Postman and SoapUI — request/response structures, status codes, error handling, and integration accuracy; validated back-end data with SQL on Oracle.
- Built and ran automated web and API test scripts in Katalon Studio; ran performance tests with JMeter; managed defects in Jira.

Fabbi- Research and Development Joint Stock Company Feb 2022 - Dec 2022

Projects: ***Executive Control System (ECS); real-estate auction & listing website; restaurant-chain HR management system — Japanese client***

Test Engineer

- Performed functional testing of a real-estate auction and listing website — auction posting, deposits, online bidding, automatic auction extension, and winning-bid display; tested real-time auction logic and post-auction payment processing.
- Tested a restaurant-chain HR system — timekeeping, shift scheduling, payroll, recruitment, labour contracts, and HR reporting; verified role-based access (manager, employee, accountant) and personal-data security.
- Analysed requirements and built test plans; designed and executed manual test cases for functional and non-functional requirements; validated data with SQL on MySQL.

•Managed defects in Backlog, working with developers for timely resolution; prepared test reports and defect metrics.

VTI – Innovation Technology Value Jan 2021 - Feb 2022

Projects: ***EE V6 — electronic document-management system for a Japanese public-administration agency — Japanese client***

Test Engineer

- Tested an electronic document-management system — archiving and securing emails and documents across affiliated units, drafting documents, and on-system workflows (document registers, leave, overtime).
- Analysed requirement documents; designed test scenarios and cases to specification; executed functional and API testing.
- Validated data with SQL via DBeaver; managed defects in Redmine; prepared test reports.

EDUCATION

Hanoi University of Business and Technology (HUBT) — Computer Programming

Pearson BTEC Level 5 Higher National Diploma (Computing) - Software Engineering

LANGUAGES

English (reading technical documentation, writing test cases) · Vietnamese (native).

ADDITIONAL INFORMATION

Enjoy reading books, listening to music, exploring new travel destinations, and relaxing with street tea culture.
