LY THI HONG HANH

Tester

Ngày sinh: 11/11/2003
Giới tính: Female
Số điện thoại: 0365203191
Email: lythihonghanhh@gmail.com
Website: https://www.linkedin.com/in/hanhlyy817a52277
Địa chỉ: Hanoi, Vietnam

OBJECTIVE

Short-term:

- Leverage 2+ years of experience to optimize QA processes and ensure high-quality product delivery.
- Deepen expertise in Technical Testing (API, SQL, Performance) and actively contribute to the team's technical growth through mentorship and best practices.

Long-term:

- Target to transition into a Test Lead. Develop strong mentoring and leadership skills to build and manage high-performing testing teams.
- Establish and optimize end-to-end testing strategies and QA processes to improve product quality and reduce release time

EDUCATION

2021 - 2025	**Thuong Mai University** Major: Management Information System Graduated: Excellent 3.62/4.0

SKILLS

Advanced skill	+ Testing Mastery: Test Strategy, Test Planning, Regression Testing, Test cases. + Technical Testing: API Testing (Postman), Database Testing (SQL), basic Automation Testing (Selenium - Java) + Domain Expertise: Camera AI, E-government system workflows. + Tools: Jira, Confluence, Balsamiq, Postman, Jmeter. + Non-functional: Basic Performance Testing (JMeter), UI/UX Analysis + Methodologies: Agile/Scrum, Waterfall, Software Development Life Cycle (SDLC).
Foreign language skills	Good reading and comprehension of English documents
Soft skills	+ Teamwork skills and ability to handle work pressure + Careful, proactive, and methodical in work + Sociable and able to adapt quickly to new work environments + Able to work well under pressure, willing to work overtime and support developers + Good communication skills

CERTIFICATIONS

2024	TOEIC Certificate with a score 550+
2024	Software Testing (Tester) at DEHA
2023	Basic + Advanced Graphic Design & Database Management at DEHA
2023	Software Business Analysis (BA) at IBPO

WORK EXPERIENCE

6/2025 - Present

VIETTEL AI
Tester Engineer

- Defined test objectives, created test plans, test reports, test data (SQL), and wrote checklists to ensure maximum feature coverage across the platform. Wrote and executed rigorous test cases to ensure high-quality product delivery.
- Performed technical API testing utilizing Postman and conducted performance testing using JMeter.
- Logged, tracked, and prioritized bugs on Jira, collaborating closely with developers for rapid root-cause analysis and resolution.
- Authored and compiled formal test documentation tailored for critical software audit phases and compliance checks.
- Wrote user instruction manuals and directly participated in guiding customers on how to use the system.
- Participated directly in product Go-Live testing and checked rapid technical verification for customer-reported production issues.
- Business analyst (BA) skills**:** Developed detailed feature specification documents, creating mockups/wireframes, sequence diagrams, activity diagrams, and complex use cases to bridge requirements with development.

08/2025 - 12/2025

DC SOFTWARE
Manual Tester
Project: SMSGW

- Wrote functional test cases, API test cases, test plans, and detailed test reports to track system quality
- The API testing for CRUD operations (Create, Read, Update, Delete) using Postman to ensure a stable data workflow.

1/2024 - 06/2025

ELCOM TECHNOLOGY COMMUNICATIONS CORPORATION
Manual tester
Project: Camera AI

- Analyzed project requirements and worked closely with Business Analysts (BAs) to clarify features and design comprehensive test cases, test plan, checklist, and test reports.
- Executed Functional and UI/UX testing strictly to ensure the product met all design specs and quality standards before client delivery.
- Tested core AI metrics for the smart traffic system, including vehicle counting, red-light violations, automatic license plate recognition, and color detection.
- Logged and tracked bugs on Jira, collaborating directly with developers to fix issues quickly and ensure smooth product performance.
