SKILL

Test Management & Bug Tracking: Jira, Zephyr
Automation Testing: Katalon , karate
API Testing: Postman, SoapUI,
Performance & Load Testing: JMeter
Version Control & CI/CD: Git (GitHub, GitLab, Bitbucket), Jenkins
Database & Debugging: SQL (DBeaver, Oracle SQL Developer,MongoDB)

WORK EXPERIENCE

10-2023 - Present

PARALINE Viet Nam

Test Leader

- Worked at MB Bank as part of the core banking software development team
- Collaborate with Business Analysts, Developers, and Product Owners to develop the bank's core software system, focusing on services such as fund transfers, payments, and foreign exchange trading
- Proficient in leveraging testing tools and tailoring testing strategies to specific business requirements, ensuring optimal resource utilization and efficiency
- Skilled in implementing suitable testing approaches and tools across diverse business domains to maximize testing effectiveness and minimize resource usage
- I am currently working as a Test Lead for a Payment Platform in a microservices architecture.
- I test major transaction channels such as ACH, 24/7 transfers, and bilateral transfers.
- My work focuses on API testing, backend validation, and verifying authentication flows such as login and token-based access.

- I also validate data consistency using database queries and support production issue investigation by analyzing logs and service interactions.
- Additionally, I actively perform log analysis when testing backend systems by checking application logs, tracing request flows across microservices, and identifying errors or performance bottlenecks. This helps me quickly detect root causes and ensure the correctness of end-to-end transactions.

10-2021 - 10-2023

FPT-SOFTWARE

Test Leader

- Domain : Fintech Work with BA , DEV to implement customer requirement Analys task , ticket from customer and BA then assign task to member and estimate , testcase in soft testing
- Having in investigate RS , Setup enviroment, Test Design, Create testcase , Execute test, Log bug, Verify bug, Regresion test
- Have experience API testing, Mobile testing, Web testing Soft

PROJECT

10-2023 - Present

Payment Platform

Test Leader

Project Description:
Developed a centralized payment platform based on microservices architecture, serving multiple transaction channels such as Mobile App, BIZ, and BASS.
The platform handles various payment and fund transfer services, including ACH, 24/7 instant transfers, and bilateral transfers, with flexible routing and processing mechanisms.

- **Fund Transfer Platform:** Supported multiple transfer channels including 24/7 instant transfer (bilateral), ACH, and Alias-based transfers
- **Payment platform**: Bill payment for services / Domestic QR payment - Global QR payment

Responsebility :

- Assign task , ticket and Estimate testing time for member in team
- Create/Update/Review Test Design and Create/Update/Review test case , Create/Update/Review checklist, Test API , Create/Update Test Scenario
- Log Bug , Review Bug , Verifed Bug
- Support re-procedure and resolve failure on production
- Proposed effective testing approaches to maximize coverage of business logic and assess the full impact of each task
- Conducted training sessions and mentoring programs for new team members, covering banking business processes and effective testing methodologies

10/2021 - 10/2023

TASCONNECT

Test Lead

- Project : A platform that helps businesses access bank loans more quickly by simplifying complex processes and enabling faster disbursement

- Assign task , ticket and Estimate testing time for member in team
- Create/Update/Review Test Design and Create/Update/Review test case , Create/Update/Review checklist, Test API , Create/Update Test Scenario
- Log Bug , Review Bug , Verifed Bug
- Execute test and report test results to PM and customers
- Support re-procedure and resolve failure on production

02/2018 - 10/2021

Tester

Project Skil Management System(12/2017-

- Check/make script migration data This project is developed to manager the skil sheet and the working time of the engineers in Yumeshin holding company. and manager schedule of the engineers in Yumeshin holiding company Skil sheet: can register, update skil of each engineers and export the skil sheet to PDF le. Working time: Can register, edit the working time in day then can approval or reject the working time. Export details salary of the each engineers in month
- Estimate testing time
- Al ocating test resources for projects
- Create/Update/Review Test Design and Create/Update/Review test case , Create/Update/Review checklist , Create/Update Test Scenario
- Log Bug , Review Bug , Verifed Bug
- Keep track of new requests from the project
- Execute test and report test results to PM and customers
- Support re-procedure and resolve failure on production
- Check/Make migration data

02/2020 - 09/2020

Tester

Medical Examination Appointment System

- project is developed to manager doctor- Patient booking calendar with doctor medicine and payment online
- Estimate testing time
- Al ocating test resources for projects
- Create Test Design and create test case , make checklist
- Review test design, test case , Review checklist
- Execute test and report test results to PM and customers
- Support re-procedure and resolve failure on production
