

KIEU XUAN THOAI

QA Automation Engineer

Phone: 0868 726 365

Email: cuxuanthoi@gmail.com

Date of Birth: 23 May 1997

Location: Thach That, Ha Noi, Vietnam

PERSONAL SUMMARY

QA Automation Engineer with 4+ years of experience in software testing, including approximately 2 years in manual testing and over 2 years in automation.

Specialized in building scalable and maintainable test frameworks using Playwright, Cypress, and Selenium, with a strong focus on improving test efficiency and product quality.

Strong background in API testing and cloud-based systems (AWS, Azure, GCP), with hands-on experience exploring modern testing approaches such as AI-assisted and LLM-based tools.

EDUCATION

Hanoi University of Industry

Sep 2016 – Apr 2019

Major: Faculty of Industrial Electronics

Thai Nguyen University

(Second Degree – Information Technology)

May 2025 – May 2027 (Expected)

CERTIFICATIONS

- ISTQB Certified Tester – Foundation Level (2022)
- Oracle Certified Professional: Java SE 17 Developer (2024)
- Oracle Database SQL (2024)
- JLPT N3 (2024)

- **English:** Intermediate
- **Soft Skills:** Adaptable, Quick Learner, Responsible, Collaborative

WORK EXPERIENCE

ISESLC (Deha VietNam)

QA Engineer | Aug 2025 -Present

Customer: UK

Description: Project for European clients, developing a charity website, CMS

Responsibilities

- Create manual and automated test cases for new features and requirement changes.
- Analyze requirements and review test documents (test cases, test reports, bug reports).
- Develop and maintain automation tests using Playwright, including building automation projects from scratch.
- Implement API automation, regression and end-to-end (E2E) tests.
- Lead a QA team of 2 members, ensuring adherence to coding standards and test case guidelines.
- Perform API testing using Postman (manual and automated).
- Design and execute regression tests suites after each new build or release.
- Communicate directly with clients and cross-functional teams (Developers, PMO) to clarify requirements.
- Research and apply new testing technologies (MCP Server, AI, LLM-based tools).

Cloud Backup Azure (Avepoint Vietnam)

QA Engineer | Aug 2024 –Aug 2025

Customer: US, Japan (Azure Cloud Backup Solutions)

Description: Develop and maintain cloud backup systems using services like AWS S3, RDS, EKS, Azure SQL, and Google Cloud Storage across major platforms such as AWS, Azure, and GCP to ensure secure and reliable data protection

Responsibilities:

- Create test cases for new features, regression test requirement changes, and bug fixes.
- Analyze requirements and review test documents (test cases, test reports, bug reports).
- Built automation framework from scratch using Cypress
- Mentor team members on automation testing best practices.
- Refactor code for readability and conciseness.
- Conduct API testing using Postman (manual and automated).
- Research Azure, AWS Cloud Technologies (Entra ID, VM, DevOps, SQL, Storage) base on roadmap of product
- Research new technologies to apply to testing (MCP server, Playwright ..)

Hisol (FPT Software)

Tester | Oct 2023 – Aug 2024

Customer: Japan

Description: Develop a Windows application for resource management.

Team Size: 29

Responsibilities:

- Create test plans for new features, requirement changes, and bug fixes.
- Analyze requirements and review test documents.
- Raise and resolve issues promptly.
- Support team members with technical issues.
- Communicate with customers regarding bugs, issues, and requirements.
- Perform testing on Windows 10 and 11 devices.

IIPG23 (FPT Software)

Developer | Jun 2023 – Sep 2023

Customer: Japan

Description: System maintenance for customers.

Team Size: 12

Responsibilities:

- Create test cases for new features, requirement changes, and bug fixes.
- Analyze requirements and review test documents.
- Write and edit SQL queries based on customer and leader requirements.
- Designed, implemented, and maintained automation scripts using Postman for RESTful API testing and Selenium WebDriver for end-to-end web UI testing, contributing to improved test efficiency and software quality.

TEMEIS22 (FPT Software)

Member | Apr 2023 – Jun 2023

Customer: Japan

Description: Develop a map system using QGIS.

Team Size: 6

Responsibilities:

- Create test cases for new features, requirement changes, and bug fixes.
- Communicate with customers regarding bugs, issues, and requirements.
- Designed, implemented, and maintained automation scripts using Postman for RESTful API testing and Selenium WebDriver for end-to-end web UI testing, contributing to improved test efficiency and software quality.

HCPlatform99Q3 (FPT Software)

Tester | Jan 2023 – Apr 2023

Customer: Japan

Description: Develop a connected app for Honda.

Team Size: 281

Responsibilities:

- Analyze and create BA documents.
- Create test cases and test reports.
- Execute tests and log bugs in JIRA.
- Write and execute API test cases.

eBankBizAppP2 (FPT Software)

Tester | Sep 2022 – Dec 2022

Customer: Japan

Description: Develop mobile apps for TPBank Biz (Phase 2).

Team Size: 61

Responsibilities:

- Perform testing on Android and iOS devices.
- Analyze requirements and review test documents.
- Summarize and report testing progress, results, and issues to customers and test managers.
- Raise and resolve issues promptly.
- Communicate with customers regarding bugs, issues, and requirements.

HCPlatform99Q1 (FPT Software)

Tester | Mar 2022 – Jul 2022

Customer: Japan

Description: Develop a connected app for Honda.

Team Size: 277

Responsibilities:

- Analyze and create BA documents.
- Create test cases and test reports.
- Execute tests and log bugs in JIRA.
- Write API automation use Postman
- Designed, implemented, and maintained automation scripts using Postman for RESTful API testing and Selenium WebDriver for end-to-end web UI testing, contributing to improved test efficiency and software quality.
- Write and execute API test cases.

eBankBizWeb (FPT Software)

Tester | Oct 2021 – Feb 2022

Customer: Vietnam

Description: Website development for TPBank's corporate customers.

Team Size: 61

Responsibilities:

- Write and execute test cases.
- Analyze requirements and review test documents.

- Raise and resolve issues promptly.
- Communicate with customers regarding bugs, issues, and requirements.
- Designed, implemented, and maintained automation scripts using Postman for RESTful API testing and Selenium WebDriver for end-to-end web UI testing, contributing to improved test efficiency and software quality.

SIDE PROJECTS

1. Selenium Automation

GitHub Repository: <https://github.com/testervippro/Selenium-Automation>

- Parallel Execution (TestNG, Selenium Grid)
- Cross platform macos,window,linux

2. Cypress Automation

GitHub Repository: <https://github.com/testervippro/Cypress-Automation>

- Parallel Execution & Test Splitting run multiple VM in FREE (bahmutov/cypress-split)
 - Page Object Model (POM) for Maintainable Tests
 - SQL Queries in Tests (@dankieu/cypress-sql ,my plugin contribute to cypress)
-
