-  Yen Hoa Ward, Ha Noi City

EDUCATION

- 2019-2023
- THUY LOI UNIVERSITY**
- Engineer of Information Systems

TECHNICAL SKILLS

SOFTWARE DEVELOPMENT PROCESS

- Agile Model & Scrum Proces, V model

TOOL

- Postman: Test API
- Jira, Jmeter, Figma

DATABASE

- Oracle, MySQL

BASIC PROGRAMMING

- Python with Robot framework

SKILLS

Foreign language:

- English B1 CEFR: good English reading comprehension skills.

Office computing:

- Word, Excel, and Power Point tools

PROFESSIONAL SUMMARY

- Over 3 years of experience in Manual Testing and basic Automation Testing in banking, securities and automotive domain
- Strong abilities in reviewing test results, test reports, defect management
- Competent in executing tests, preparing test data, and tracking bugs
- Experienced in using tools such as Jira, Postman, MySQL, and Robot Framework.
- Familiar with Agile/Scrum and V model development process
- Responsible at work, logical thinking, and good problem solving skills

WORK EXPERIENCE

FPT SOFTWARE

04/2024 - 06/2026

Position: Manual & Automation Tester

- Testing systems related to banking and automotive operations.
- Analyze requirement documents
- Create Test plan/Test checklist/Test case for the project
- Execute functional, system, and user acceptance testing
- Log, verify, and perform regression testing
- Perform both manual testing and automated testing.
- Using Robot framework with Python in automation testing
- Data testing, performance testing and data querying.
- Weekly reports and discussions for customer.
- Support and training other member

FPT SECURITIES

08/2022 - 03/2024

Position: Manual Tester

- Gain knowledge of securities and banking operations.
- Collaborate with Developers, BA and PO to clarify business requirements and troubleshoot issues.
- Analyze requirements and design test cases/test scenarios for web, mobile (iOS/Android), integration workflows, and APIs.
- Monitor and report bugs using the Jira management tool.
- UAT testing and system integration testing
- Write test cases based on the SRS documents.
- Create test plans and generate test reports.
- Utilize the JMeter tool and Oracle Database.
- Report daily to team leader.

PROJECT

Project : UOB banking system app

08/2025 - 06/2026

Position: Manual Tester

- Description: This project is an all-in-one banking app that simplifies and personalizes financial management. It offers features such as money transfers, bill payments, login, account, rewards, engagement.
- Team size: 48 members
- Responsibilities in the project:
 - Analyze system requirements
 - Designed and executed test cases for Login, Access & Security, Payment & Transfer modules
 - Performed SIT, UAT and Regression Testing
 - Check data test, log bug, tracking bugs, and verify fixed bugs
 - Conducted API testing using Postman and database validation using MySQL
 - Performed Performance Testing using JMeter
 - Tracked defects and collaborated with DEV teams for issue analysis
 - Write user manuals for end users
- Tool: Jira, Figma, Excel, mobile, IDT, OAH, MySQL, Jmeter

Project : Renault CDC

04/2024 - 08/2025

Position: Manual & Automation Tester

- Description: This is a system used to intelligently simulate automotive devices and scenarios for in-car systems.
- Team size: 10 members
- Responsibilities in the project:

Manual test

- Analyze SRS documents and clarify requirements with the team.
- Create Test plan, Test checklist and Test case for the project
- Perform regression testing for system updates.
- Log bug, tracking bugs, and verify fixed bugs
- Investigate issues and provide reports to customers.
- Train and support new team members

Automation test

- Implement automated testing using Robot Framework (Python) for functionalities.
 - Run test scripts and analyze run results.
 - Evaluate the automated testing process.
- Tool: Jira, Android, Linux, Robot Framework, excel, smartphone

Project: BANK-SAVINGS

08/2022 - 03/2024

Position: Manual Tester

- Description: Bank-Savings is a savings deposit system linked to a bank, in which FPTC acts as an intermediary, carrying out deposit and settlement of deposits at the bank upon customer's request.
- Team size: 7
- Responsibilities in the project:
 - Analyze requirement documents and estimate tasks
 - Update Test Cases for each testing cycle and execute Test Cases
 - Write and review Test Cases
 - Use SQL to query and check data in the database
 - Perform performance testing with JMeter.
- Tool: JMeter, MySQL, Word, Excel, smartphone
