

TRANG PHAM THU

QC Engineer

0357901664 | trangph059@gmail.com | linkedin.com/in/trangpham-qa | My Dinh Ward, Hanoi

PROFESSIONAL SUMMARY

Manual Tester with 5+ years of experience in Web/App, API, and complex system testing. Proven ability to design test strategies, lead QA processes, and deliver high-quality releases in Agile environments. Experienced in risk analysis, process improvement, and cross-functional collaboration to optimize testing efficiency. Currently expanding expertise in Data Testing and Performance Testing. Career trajectory targeting Senior QA > Test Lead > QA Manager, with a focus on building high-performing QA teams and fostering a quality-driven engineering culture.

EDUCATION

Banking Academy of Vietnam

09/2016 - 06/2020

- Major: Management Information Systems

CERTIFICATION

ISTQB Certified Tester Foundation Level (CTFL)

2023

SKILLS

Testing Types:

- Functional Testing, Integration Testing, System Testing, Regression Testing, User Acceptance Testing (UAT), API Testing, Database Testing, Performance Testing

Professional Skills:

- Quality-first testing mindset, focused on defect prevention rather than detection alone.
- Ability to analyze SRS documents, requirement specifications, and effectively identify system risks.
- Proactively builds Test Plans, designs Test Cases, and tracks testing progress across Sprints (Agile/Scrum).
- Mentors new team members and supports task allocation within the QA team.
- Reviews BA documents and Figma designs; collaborates closely with Developers and Business Analysts.
- Works effectively in Agile/Scrum environments, ensuring sprint delivery on schedule.
- Performs well under high pressure, maintaining product quality and meeting release deadlines.
- Drives process improvement and optimizes overall team productivity.
- Communicates with international clients (Japan, South Korea) via English-based workspaces.

TECHNOLOGIES

- Jira, Redmine, TestRail, Postman, Apache JMeter, Microsoft SQL Server, Oracle Database, MongoDB, Oracle VM VirtualBox

EXPERIENCE/ 5+ YEARS

VIETTEL TECHNOLOGY INVESTMENT CO., LTD.

03/2025 - Now

1. **Client:** General Department of Politics - Vietnam

2. Project Description:

- Digital transformation system covering multiple subsystems, organizations, and units under the General Department of Politics
- Operating environment: Web, App, Mobile

3. Position:

- QA Engineer / Sub-Test Lead

4. Responsibilities:

- Analyzed SRS documents and business workflows for each subsystem within the digital transformation system.
- Developed overall test strategies and test plans for assigned modules/subsystems.

- Estimated testing effort, allocated tasks, and tracked testing progress across phases/sprints.
- Designed and reviewed Test Cases, ensuring full test coverage aligned with business requirements and risk levels.
- Performed Functional, Integration, and System Testing; supported User Acceptance Testing (UAT).
- Conducted API Testing and validated data against the database (SQL validation).
- Participated in integration testing across subsystems.
- Managed test environments and prepared test data, ensuring compliance with system security requirements.
- Reported product quality based on testing metrics and data.
- Managed and tracked defects in the defect management system; assessed impact severity prior to release.
- Collaborated with BAs, Developers, and business units to clarify requirements and resolve arising issues.
- Reported product quality status and release readiness to the Project Manager.
- Mentored and supported QA team members.

FPT SOFTWARE CO., LTD.

10/2021 - 02/2025

1. Client: Toyota Corporation, Japan

2. Project Description:

- A software-based inventory management system for the client - Operating environment: Windows, macOS, iOS, Android
- Developed a new system based on the legacy system with improved, upgraded, and more modern features for better usability, including: Data Query & Management, User Management & Role-Based Access Control, Product Management, Forgot Password, Search, Unit Management, and more.

3. Position: Tester

4. Responsibilities:

- Analyzed SRS documents provided by the Project Manager.
- Completed test documentation (test results) and configuration management documents (when required).
- Performed Functional Testing, System Integration Testing, and User Acceptance Testing (UAT).
- Built test scenarios and test scripts; evaluated product quality and proposed feature improvements.
- Communicated with clients via online channels.
- Reported testing risks; logged and tracked detected defects in the defect management system.
- Reviewed BA documents and Figma designs.
- Mentored new team members.

ISOFH TECHNOLOGY JOINT STOCK COMPANY

09/2020 - 09/2021

1. Client: Saint Paul General Hospital, Hanoi

2. Project Description:

- A web-based Hospital Information System (HIS) for hospital management - Operating environment: Windows, macOS, iOS, Android
- Developed a hospital management system with efficient and user-friendly features for medical staff, including: Add, Search & Manage Patient Records; User Role-Based Access Control; Edit, Delete & Fill in Medication Information, and more.

3. Position: Tester

4. Responsibilities:

- Analyzed Software Requirements Specification (SRS) documents.
- Performed Functional Testing, System Testing, and Integration Testing.
- Built test scripts; evaluated product quality and proposed feature improvements.
- Reported testing risks and logged detected defects in the defect management system.
- Reviewed BA documents and Figma designs.

ADDITIONAL EXPERIENCE

09/2019 - 12/2019: Software Testing Course at Tester Top Training Center

INTERNSHIP MAJOR

INTERNSHIP MAJOR 2

- *Job position: Creating solutions development Management information system for bussiness*

01/2019 - 08/2019

Project Description:

- Support the company build a new, consistent, automated management information system that replaces the company's current manual management.
- The system includes functions: Management of sales processes, Management of people, Management of goods, Management of problems arising in the business process.
- Technology used: Microsoft SQL Server 2008, Visual Studio 2010.

INTERNSHIP MAJOR 1

- *Job position: Designer for Sales management program*

01/2018 - 06/2018

Project Description:

- Support the company build a new, consistent, automated management information system that replaces the company's current manual management.
- The system includes functions: Management of sales processes, Management of people, Management of goods, Management of problems arising in the business process.
- Technology used: Microsoft SQL Server 2008, Visual Studio 2010.
